- Polio
- Varicella (Chickenpox) — either vaccine or history of disease documented by healthcare provider

- **7th Grade Entry**

- Tetanus-Diphtheria-Pertussis (Tdap)—In addition to all other immunization requirements

Forms Required for Immunization Documentation

The Florida Certification of Immunization, Form DH 680, must be used to document the immunizations required for entry and attendance in Florida schools. These forms must be completed by a Florida physician or a Florida county health department. If moving to Florida, get a copy of your child's complete immunization history before leaving the current state of residence. The local county health department or your private provider will need this information to complete the Form DH 680.

Don't forget to take your child's immunization record with you to every doctor's appointment. Keep your child's record in a safe place. Documentation of immunization is required for entry into most colleges, universities, and the military.
